1 **NOTICE OF MOTION AND MOTION**

2 PLEASE TAKE NOTICE that on February 4, 2026 at 10:00 a.m., Plaintiffs will and hereby do  
3 move the Court to exclude the opinions of Defendant Google LLC’s (“Google”) experts William Patry and  
4 Ryan Sullivan. Pursuant to Section VIII(a) of the Court’s Standing Order, Plaintiffs certify compliance  
5 with the Court’s meet and confer requirement which took place on December 23, 2025.

6 **STATEMENT OF REQUESTED RELIEF AND ISSUE TO BE DECIDED**

7 Whether the opinions of William Patry, including those regarding whether “individualized issues”  
8 exist regarding copyright registrations, should be excluded under Federal Rule of Evidence 702 and the  
9 standards articulated in *Daubert v. Merrell Dow Pharms., Inc.*, 509 U.S. 579 (1993) (“*Daubert I*”).

10 Whether the opinions of Ryan Sullivan, including those regarding whether “individualized issues”  
11 exist regarding copyright registrations, should be excluded under Federal Rule of Evidence 702 and the  
12 standards articulated in *Daubert v. Merrell Dow Pharms., Inc.*, 509 U.S. 579 (1993) (“*Daubert I*”).

13 **I. INTRODUCTION**

14 Plaintiffs move to strike the Expert Reports of William Patry and Ryan Sullivan, submitted by  
15 Google in opposition to class certification, because they fail to satisfy the core requirements of Rule 702  
16 of the Federal Rules of Evidence under *Daubert I*. Patry formerly served as Google’s Senior Copyright  
17 Counsel for over 17 years and now works at Quinn Emanuel, where he represents other large technology  
18 companies in litigation involving the use of copyrighted works to train artificial intelligence models. Given  
19 that background, it is unsurprising that he supports Google’s position here. But his report is not admissible  
20 expert testimony. Patry’s improperly opines on legal issues reserved for the Court, and his opinions are  
21 conclusory, unsupported, and unreliable. His report should therefore be excluded in its entirety.

22 Sullivan’s report suffers from parallel deficiencies. Although Sullivan purports to offer economic  
23 opinions, his analysis improperly rests on legal conclusions about fair use that are reserved for the Court.  
24 Throughout his report, [REDACTED]  
25 [REDACTED]—a contested legal issue at the heart of this litigation—and uses that as the foundation for his  
26 economic opinions. An economist cannot determine whether fair use does or does not apply; that is a four-  
27 factor legal test under 17 U.S.C. § 107. Sullivan’s opinions are inadmissible because they rest on improper  
28 legal conclusions.

## II. LEGAL STANDARD

Under Fed. R. Evid. 702, expert testimony is admissible only if it is both relevant and reliable. *See Daubert I*, 509 U.S. at 589. Testimony is relevant if it will “assist the trier of fact to understand or determine a fact in issue.” *Cooper v. Brown*, 510 F.3d 870, 942 (9th Cir. 2007). To be reliable, the testimony must be “based on sufficient facts or data,” “the product of reliable principles and methods,” and “reflect[] a reliable application of the principles and methods to the facts of the case.” Fed. R. Evid. 702.

District courts must act as “gatekeepers” to ensure that expert testimony is sufficiently reliable to assist the factfinder in understanding or determining a fact at issue, and to exclude unreliable and irrelevant expert testimony. *Cooper*, 510 F.3d at 942 (citing *Elsayed Mukhtar v. Cal. State Univ., Hayward*, 299 F.3d 1053, 1063 (9th Cir. 2002), *overruled on other grounds by United States v. Bacon*, 979 F.3d 766 (9th Cir. 2020)). Deciding questions of law is the exclusive province of the trial judge, and an expert may not opine on questions that are matters of law for the court. *Berman v. Freedom Fin. Network, LLC*, 400 F.Supp.3d 964, 971 (N.D. Cal. 2019) (collecting cases). Nor may an expert opine on an ultimate issue of fact, as in doing so the expert substitutes his judgment for that of the finder of fact. *Id.* (“An expert is generally not permitted to opine on an ultimate issue of fact except in limited circumstances, since such opinions may ‘invade the province of’ the jury.” (quoting *Nationwide Transp. Fin. v. Cass Info. Sys., Inc.*, 523 F.3d 1051, 1060 (9th Cir. 2008))); *Nationwide Transp. Fin.*, 523 F.3d at 1060 (“[E]vidence that merely tells the jury what result to reach is not sufficiently helpful to the trier of fact to be admissible.” (quoting *Kostelecky v. NL Acme Tool/NL Indus., Inc.*, 837 F.2d 828, 830 (8th Cir.1988))).

“The proponent of expert testimony has the burden of proving admissibility in accordance with Rule 702.” *LD v. United Behavioral Health*, 2023 WL 2806323, at \*2 (N.D. Cal. Mar. 31, 2023). And “a court must first find by a preponderance of the evidence that the expert’s basis and methodology are sufficient.” *Laatz v. Zazzle, Inc.*, 2025 WL 3205586, at \*3 (N.D. Cal. Nov. 17, 2025).

## III. ARGUMENT

### A. Patry and Sullivan Offer Improper Opinions on Ultimate Issues of Law

It is well established that an expert may not opine on “matters of law for the court.” *Berman*, 400 F.Supp.3d at 971. Nor may an expert “give an opinion as to [a] legal conclusion, *i.e.*, an opinion on an ultimate issue of law.” *Hangarter v. Provident Life & Acc. Ins. Co.*, 373 F.3d 998, 1016 (9th Cir. 2004)

1 (citation omitted); *United States v. Tamman*, 782 F.3d 543, 552–53 (9th Cir. 2015) (affirming exclusion of  
2 expert testimony that “provided only a recitation of facts and the legal conclusion that [defendant] . . . did  
3 not break the law”).

4 Patry’s report disregards this clear rule. He repeatedly opines that topics relating to ownership and  
5 validity registration may create “individualized issues” with respect to copyright registrations. *E.g.*, Expert  
6 Report of William Patry (“Patry Rpt.”) (ECF No. 288-27), ¶¶ 10 (“claims of ownership, the material  
7 covered, or the validity of the registration . . . are dependent on the unique facts applicable to each  
8 individual work, and litigation is often necessary to assess them”); 13 (“That sort of ownership dispute is  
9 only the beginning of the kinds of individualized issues that can arise with respect to copyright  
10 registrations.”); 25 (“Registrations that state inaccurate information can be and often are invalidated in  
11 litigation, but obtaining information to identify such misrepresentations can be an arduous and highly  
12 individualized undertaking”). But whether purported individualized issues defeat predominance is a legal  
13 conclusion, not a proper subject of expert testimony. *United Behavioral Health*, 2023 WL 2806323, at \*3  
14 (excluding report the court called a “thinly disguised attempt to submit what is essentially an amicus brief  
15 as an expert report”); *Fitzhenry-Russell v. Keurig Dr. Pepper Inc.*, 2018 WL 10472794, at \*3 (N.D. Cal.  
16 Sep. 25, 2018) (excluding expert opinion, holding “whether an individualized inquiry is necessary to the  
17 extent that the class cannot be certified is a legal conclusion”); *RJ v. Cigna Health & Life Ins. Co.*, 2024  
18 WL 1107826, at \*5 (N.D. Cal. Feb. 12, 2024) (“To the extent that [plaintiff’s expert] is offering her opinion  
19 on whether class certification is appropriate in this case or the permissible inferences the Court may draw,  
20 such opinions do not assist the Court in understanding the evidence or determining a fact in issue.”). Thus,  
21 Patry’s opinions should be stricken as improper legal conclusions.

22 Patry also submits opinions about the individual work needed to assess each potential ownership  
23 topic. *E.g.*, Patry Rpt. ¶¶ 14 (“Even for a single work or a small number of works, this can be a time-  
24 consuming and difficult process.”); 16 (“Disputes over a work’s status as one made for hire are routinely  
25 fought out in court”); 18 (“This is an extremely complicated issue to investigate as questions of transfer  
26 are governed by rigid timelines, and disputes often arise after an extended passage of time so that evidence  
27 is no longer accessible.”); 20 (“[Orphan works] remain a significant problem”); 21 (“determining whether  
28 individual works in a compilation were validly registered . . . must be undertaken separately as to each

1 individual work in the collection”); 22 (“Understanding whether a group registration is valid requires a  
2 factual and legal inquiry into the complicated question of ‘publication’ of materials in the group  
3 registration.”); 23 (derivative works raises “significant issues since they go to the scope of the registration,  
4 and possibly its validity, and require examination of individual factual and legal issues on a case-by-case  
5 basis”); 24 (“if there is a dispute about whether a work is original and thus whether it is copyrightable, that  
6 is a matter that must be considered on a case-by-case basis in litigation”). These opinions are improper  
7 because they make conclusions about the complexity of ownership issues, which is a matter for the Court  
8 to decide. *See Utne v. Home Depot U.S.A., Inc.*, 2022 WL 1443338, at \*3 (N.D. Cal. May 6, 2022)  
9 (excluding as improper legal opinion expert’s testimony that “there are individualized issues that cannot  
10 be managed without collecting detailed individualized facts and data”).

11 This is not the first time that Patry has improperly attempted to offer legal conclusions under the  
12 guise of expert testimony. In *Music Sales Corp. v. Morris*, the court in the Southern District of New York  
13 struck an affidavit submitted by Patry because it “almost wholly expresses legal conclusions on the  
14 meaning of the [Copyright Act].” 73 F.Supp.2d 364, 381 (S.D.N.Y. 1999). His report here suffers from the  
15 same defect and should likewise be stricken.

16 Sullivan’s report suffers from the same fundamental defect: it offers legal conclusions disguised as  
17 economic analysis. Throughout his report, Sullivan criticizes Plaintiffs’ economist, Dr. Michael D. Smith,  
18 for [REDACTED]. But Smith’s opinions focus on Google’s  
19 conduct and its effects on the licensing market for copyrighted works. Fair use or copyright infringement  
20 is never an input of his analysis. His opinions on market exist independent of the legal outcome in this case.  
21 *See Ex. 205 (Michael D. Smith Rebuttal Rpt.)* to the Supplemental Declaration of Gregory S. Mullens in  
22 Support of Plaintiffs’ Reply in Support of Class Certification (“Suppl. Mullens Decl.”), ¶ 32.

23 Sullivan takes the opposite approach. Sullivan’s analysis depends on the assumption that [REDACTED]  
24 [REDACTED]. For example, Sullivan  
25 opines that “[REDACTED]  
26 [REDACTED]” Expert Report of Ryan Sullivan (“Sullivan Rpt.”) (ECF No.  
27 289-36), ¶ 34. He dismisses Smith’s harm analysis because it “[REDACTED].”  
28 *Id.* ¶ 24. And he rejects arguments about Google’s [REDACTED]

1 [REDACTED]

2 [REDACTED] *Id.* ¶ 43. Under Sullivan’s framework, [REDACTED]

3 [REDACTED]. Because his opinions are premised on an  
4 improper legal conclusion that fair use applies, they too should be excluded.

5 **B. Patry’s and Sullivan’s Legal Conclusions Will Not Help the Trier of Fact**  
6 **Understand the Evidence or Determine a Fact in Issue**

7 Expert opinions should be excluded if they do not “speak[] clearly and directly to an issue in dispute  
8 in the case.” *Daubert v. Merrell Dow Pharms., Inc.*, 43 F.3d 1311, 1321 n.17 (9th Cir. 1995) (“*Daubert*  
9 *II*”). Expert testimony “fit[s]” the case if it “logically advances a material aspect of the proposing party’s  
10 case.” *Id.* at 1315; *see also Senne v. Kan. City Royals Baseball Corp.*, 591 F.Supp.3d 453, 479 (N.D. Cal.  
11 2022) (explaining the fit requirement “is more stringent than the relevancy requirement of Rule 402 of the  
12 Federal Rules of Evidence, ‘reflecting the special dangers inherent in scientific expert testimony’” (citation  
13 omitted)).

14 Patry’s opinions do not satisfy this standard. His opinions concern the administrative feasibility of  
15 identifying the legal and beneficial owners of copyrighted works at issue. But the Ninth Circuit expressly  
16 rejected any administrative feasibility requirement under Rule 23. *See Briseno v. ConAgra Foods, Inc.*, 844  
17 F.3d 1121, 1124–25 n.4, 1128 (9th Cir. 2017) (in the context of identifying purchasers of cooking oil); *see*  
18 *also Norton v. LVNV Funding, LLC*, 2020 WL 5910077, at \*11 (N.D. Cal. Oct. 6, 2020) (“*Briseno*’s core  
19 holding was that administrative feasibility cannot be considered in a vacuum; instead, a court must consider  
20 the overall costs and benefits of class adjudication given the particular nature of the case.”). In *Bartz v.*  
21 *Anthropic PBC*, Judge Alsup declined to find similar arguments about ownership issues sufficient to defeat  
22 class certification, noting: “In the district judge’s experience and judgment, very few disputes over  
23 ownership will arise but if they do they can be resolved by the district judge on a summary judgment or by  
24 a jury at trial (or by excluding the work altogether from the class).” 791 F.Supp.3d 1038, 1061 (N.D. Cal.  
25 2025). Because Patry’s opinions address issues that could arise through the administrative process, they  
26 are not suited to the Rule 23 analysis. His opinions also deeply contrast with Judge Alsup’s expressed  
27 judgment, further exemplifying that Patry’s opinions squarely concern legal issues better suited for the  
28 Court.

1 Sullivan’s opinions similarly fail to assist the Court. Sullivan offers no opinion that Google’s  
2 conduct caused no market harm, nor any affirmative economic analysis of his own. Instead, he merely  
3 [REDACTED]. But  
4 Sullivan’s [REDACTED] do not themselves establish that individualized  
5 inquiries would predominate. Sullivan offers no explanation of what individualized inquiries would  
6 actually be necessary, no theory of how factor four evidence used for Google’s fair use defense would  
7 differ for any one plaintiff versus another, and no evidence contradicting Smith’s showing that Google’s  
8 [REDACTED]. In  
9 sum, Sullivan’s report is entirely devoid of any affirmative theory as to why Google’s conduct caused no  
10 market harm despite bearing the burden on that issue. *See Dr. Seuss Enters., L.P. v. ComicMix LLC*, 983  
11 F.3d 443, 459 (9th Cir. 2020) (“Not much about the fair use doctrine lends itself to absolute statements,  
12 but the Supreme Court and our circuit have unequivocally placed the burden of proof on the proponent of  
13 the affirmative defense of fair use.”).

14 Because Patry’s and Sullivan’s opinions do not advance any material aspect of Google’s opposition  
15 to class certification, they should be excluded.

### 16 C. Patry’s Experience Is Not Germane to the Opinions Offered

17 Rule 702 requires that the Court determine whether Patry “is qualified by special knowledge as an  
18 expert *in the relevant area of expertise.*” *AFMS LLC v. United Parcel Serv. Co.*, 2014 WL 12515335, at  
19 \*6 (C.D. Cal. Feb. 5, 2014) (emphasis added). Patry fails this threshold requirement. His report does not  
20 rest on a “a reliable basis in the knowledge and experience of [the relevant] discipline.” *Kumho Tire Co.,*  
21 *Ltd. v. Carmichael*, 526 U.S. 137, 141, 149 (1999) (quoting *Daubert I*, 509 U.S. at 592); *see also Lewert*  
22 *v. Boiron, Inc.*, 212 F.Supp.3d 917, 924 (C.D. Cal. 2016) (requiring courts to consider “whether the expert  
23 is qualified to present the opinion offered”); *Haynes ex rel. Haynes v. National R.R. Passenger Corp.*, 319  
24 F. App’x 541, 542 (9th Cir. 2009) (affirming the exclusion of expert testimony from a person with  
25 “extensive qualifications and education in ‘Human Factors’” who attempted to testify about medical risks  
26 associated with prolonged train travel and their foreseeability).

27 Patry’s experience does not qualify him to render an opinion about the accuracy of class-wide  
28 registrations. Patry worked as Copyright Counsel for Google for seventeen years, litigating copyright

1 disputes that arose between and from Google. Experience acting as Google’s advocate hardly represents  
2 the experiences of the nationwide classes at issue here. ECF No. 253-1 at 2. Further, Patry’s roles as outside  
3 counsel for large technology companies at Mayer Brown and Quinn Emanuel do not add any diversity to  
4 his experience, as he represents large technology companies regarding their alleged copyright infringement  
5 through the use of their AI technologies. His experience does not represent the vast majority of instances  
6 where, as Judge Alsup noted, ownership issues are amicably worked out—it is to Google’s advantage to  
7 create the illusion that they are not. *Bartz*, 791 F.Supp.3d at 1052–53. Nor does Patry’s experience as a law  
8 professor and at the U.S. House of Representatives qualify him to opine on the state of copyright ownership  
9 across the at-issue classes. And Patry does not claim to have studied a single copyright record in preparing  
10 his report. While Patry has extensive experience representing Google and other large technology  
11 companies, that does not qualify him to opine about the reliability of all copyright registrations within the  
12 class or the likelihood of ownership issues arising.

13         Moreover, Patry’s brief stint at the U.S. Copyright Office was over 30 years ago, when artificial  
14 intelligence was still the stuff of fiction. This does not support Patry’s qualifications to opine regarding the  
15 U.S. Copyright Office’s operations, *let alone how it operates in this century*. Yet, Patry relies on this brief  
16 and aged experience to opine that registrations are unreliable because the “[t]he Copyright Office has a  
17 small examining core of approximately 110 examiners (out of a total of 450 employees) who are tasked  
18 with reviewing approximately 500,000 applications per year” and that “a single copyright examiner would  
19 have to review about 50,000 applications for copyright registration per year.” Patry Rpt. ¶ 9. Patry’s sources  
20 do not support these figures. Patry relies upon a statement from Shira Perlmutter (Register of Copyrights  
21 and Director, U.S. Copyright Office), which discusses the number of registered works—not applications.  
22 And the statement does not specify the number of examiners at the Office. Even accepting Patry’s numbers,  
23 however, his analysis that “a single copyright examiner would have to review about 50,000 applications  
24 for copyright registration per year” is overstated by a factor of 10 (*i.e.*, 500,000 applications / 110 examiners  
25 = 4,545.45 applications per year). Patry’s opinions about the operations of the U.S. Copyright Office are  
26 entirely speculative. Under Rule 702, they should be excluded.

1           **D. Patry’s Analysis Is Superficial, One-Sided, and Unreliable**

2           To satisfy the reliability standard under Federal Rule of Evidence 702, expert opinions must  
 3 “identify [an] objective source” to show they “follow[] a scientific method embraced by at least some other  
 4 experts in the field.” *Cabrera v. Cordis Corp.*, 134 F.3d 1418, 1423 (9th Cir. 1998); *see Claar v. Burlington*  
 5 *N. R. Co.*, 29 F.3d 499, 502 (9th Cir. 1994) (affirming exclusion of expert whose conclusions were not  
 6 “based on scientific knowledge” or “scientific methods and procedures,” but rather by “mere subjective  
 7 beliefs or unsupported speculation”). Where, as here, an expert testifies based on personal knowledge and  
 8 experience, such qualitative expert work may be excluded where the “expert’s reasoning is circular,  
 9 speculative, or otherwise flawed,” or not “adequately explained.” *United States v. Holguin*, 51 F.4th 841,  
 10 855 (9th Cir. 2022). Courts are mindful that “reliability becomes more, not less, important when the  
 11 ‘experience-based’ expert opinion is . . . not subject to routine testing, error rate, or peer review type  
 12 analysis, like science-based expert testimony.” *Porter v. Martinez*, 68 F.4th 429, 445 (9th Cir. 2023)  
 13 (quoting *United States v. Valencia-Lopez*, 971 F.3d 891, 898 (9th Cir. 2020)). Patry’s report does not meet  
 14 these standards. His opinions are conclusory, do not consider contradictory evidence, and are mired in  
 15 Patry’s litigation-outcome-driven point of view.

16           1.       Patry’s Opinions Are Conclusory

17           Patry offers the opinion “that matters recited in copyright registrations are not necessarily accurate  
 18 or correct.” Patry Rpt. ¶ 8. Throughout his report, Patry repeatedly opines that speculative issues pertaining  
 19 to the identity of rightsholders or fraud in registrations create “individualized issues” that render the records  
 20 of the U.S. Copyright Office unreliable. *Id.* ¶ 13; *see also id.* ¶10 (“issues are dependent on the unique facts  
 21 applicable to each individual work, and litigation is often necessary to assess them”). Patry’s report should  
 22 be stricken because it does not provide “sufficient explanation of the methodology utilized and how the  
 23 methodology was applied to reach each respective opinion.” *Fischler Kapel Holdings, LLC v. Flavor*  
 24 *Producers, LLC*, 2023 WL 8113301, at \*4 (C.D. Cal. Oct. 6, 2023) (collecting cases). Indeed, Patry does  
 25 not “identify [any] objective source” or “follow[] a scientific method embraced by at least some other  
 26 experts in the field.” *See Cabrera*, 134 F.3d at 1423; *United States v. Williams*, 2017 WL 3498694, at \*12  
 27 n.25 (N.D. Cal. Aug. 15, 2017) (“Consideration of a methodology’s scientific validity must necessarily  
 28 entail how the methodology is employed, even when the methodology itself is generally accepted.”).

1 Instead, his opinions are based on his “experience” as a copyright practitioner alone. Patry Rpt. ¶ 8. But  
 2 experience alone is “an abstraction not visible to the eyes of the Court, the jury, and opposing counsel, or  
 3 testable in the crucible of cross-examination.” *Open Text S.A. v. Box, Inc.*, 2015 WL 349197, at \*6 (N.D.  
 4 Cal. Jan. 23, 2015); *see GPNE Corp. v. Apple, Inc.*, 2014 WL 1494247, at \*6 (N.D. Cal. Apr. 16, 2014)  
 5 (“[Defendant] cannot cross-examine Mr. [Patry] on his assertions, all of which fundamentally reduce to  
 6 taking his opinion based on 30 years of experience for granted.”). Because his opinions are based entirely  
 7 on “say so,” they are necessarily unreliable. *Siqueiros v. Gen. Motors LLC*, 2022 WL 74182, at \*14 (N.D.  
 8 Cal. Jan. 7, 2022) (“Without such information or explanation of the methodology that [Patry] applied to  
 9 reach [his] conclusions, [Patry’s] conclusions are grounded in nothing more than his say so.”); *see also*  
 10 *Gen. Elec. Co. v. Joiner*, 522 U.S. 136, 146 (1997) (“[N]othing in either *Daubert* or the Federal Rules of  
 11 Evidence requires a district court to admit opinion evidence that is connected to existing data only by the  
 12 *ipse dixit* of the expert.”). They opinions should be excluded on this basis.

13 2. Patry’s Opinions Are Deeply Flawed Because They Do Not Consider  
 14 Contradictory Evidence or Analysis

15 “Generally, an expert need not rule out every potential cause to satisfy *Daubert*, as long as the  
 16 expert’s testimony addresses obvious alternative causes and provides a reasonable explanation for  
 17 dismissing specific alternate factors identified by the defendant.” *Stanley v. Novartis Pharms. Corp.*, 11  
 18 F.Supp.3d 987, 1001 (C.D. Cal. 2014) (cleaned up); *see also In re Live Concert Antitrust Litig.*, 863  
 19 F.Supp.2d 966, 973 (C.D. Cal. 2012) (explaining that other “flaws . . . typically go to the weight, rather  
 20 than the admissibility, of the expert’s testimony”). “In some cases, however, the analysis may be ‘so  
 21 incomplete as to be inadmissible as irrelevant.’” *Hemmings v. Tidyman’s Inc.*, 285 F.3d 1174, 1188 (9th  
 22 Cir. 2002) (quoting *Bazemore v. Friday*, 478 U.S. 385, 400 n.10 (1986)). For example, an expert’s failure  
 23 to consider a “‘major factor’ . . . which should have been included . . . renders [an] analysis so incomplete  
 24 as to be inadmissible as irrelevant.” *In re Live Concert Antitrust Litig.*, 863 F.Supp.2d at 975–76 (cleaned  
 25 up) (excluding expert opinion on concert ticket prices for failure to consider artist popularity); *see also*  
 26 *Claar*, 29 F.3d at 502 (affirming exclusion of experts who “made [no] effort to rule out other possible  
 27 causes for the injuries plaintiffs complain of, even though they admitted that this step would be standard  
 28 procedure before arriving at a diagnosis”).

1 Patry does not even attempt to consider conflicting sources or evidence in rendering his opinion.  
2 For example, Patry does not consider that applicants for copyright registrations must certify the accuracy  
3 and completeness of their application under penalty of perjury. *See* Ex. 207 (Mark Seeley Rebuttal Rpt.)  
4 to the Suppl. Mullens Decl., ¶ 20. Such a certification enhances the reliability and accuracy of the final  
5 registration record. Nor does Patry consider that copyright registration records are public and made  
6 available for inspection, which enhances the reliability and accuracy of the records. *Id.* ¶¶ 28–29. And Patry  
7 ignores that not only are over 30 pieces of information required for an application, including a deposit  
8 copy, over 20% of the time there is “correspondence” on an application to ensure that an application is  
9 complete and accurate. *Id.* ¶ 16. Further, Patry does not consider in rendering his opinion or include in his  
10 report the vast majority of examination steps in Compendium III (Chapter 600), which is an over 200-page  
11 manual that details (and provides for) a lengthy and robust examination process by trained specialists that  
12 takes approximately two months to conduct, before a registration is granted. *Id.* ¶¶ 15–19.<sup>1</sup> Patry’s failure  
13 to consider any evidence contrary to his point of view renders his opinions unreliable.

### 14 3. Patry’s Opinions Should be Excluded as Litigation Results-Oriented

15 The Court should also consider Patry’s strong “incentive to reach a particular outcome” helpful to  
16 Google. *Lin v. Solta Med., Inc.*, 2024 WL 5199905, at \*2 (N.D. Cal. Dec. 23, 2024) (citing *Daubert II*, 43  
17 F.3d at 1317). The incentives here are unmistakable. Patry’s experiences working at Google and  
18 representing companies in similar litigation over the use of copyrighted works to train AI models, support  
19 that Patry has a strong interest in seeing that no class is certified in this action. This direct stake in the  
20 outcome further undermines the reliability of his opinions and warrants their exclusion. *Id.*

## 21 IV. CONCLUSION

22 For the reasons set forth herein, Plaintiffs respectfully request that the Court exclude Patry’s and  
23 Sullivan’s expert reports and testimony.
